SUNNYSLOPE COUNTY WATER DISTRICT

HYDRANT METER RENTAL FACT SHEET

(Per District Code and Ordinance No. 79 – Title 3: Water Service System)

This fact sheet outlines the responsibilities, requirements, and conditions governing the rental and use of a District-owned hydrant meter. All contractors and permittees must comply with Sunnyslope County Water District (“District”) policies and ordinances at all times.

1. Permit Requirements: A completed and signed Hydrant Meter Application must be submitted and approved by the District prior to issuance. Valid identification of permittee must be presented and scanned with application. The hydrant meter is for temporary water service only and must be used exclusively for the project and location approved by the District.

2. Deposit and Fees: A refundable deposit of \$800.00 is required at the time of rental. Monthly service charges, water-use charges, and any applicable connection fees are billed according to the District’s current rate schedule. Deposits are refundable only after the hydrant meter is returned in good working order and all charges are paid in full.

3. Meter Loss or Damage: The permittee assumes full responsibility for the care, security, and condition of the hydrant meter. If a hydrant meter is lost, stolen, or damaged, the permittee must pay the full replacement cost of \$2,780.22, which includes the meter, tax, shipping, and handling. Any damage to District property will be billed to the permittee at actual repair or replacement cost.

4. Water Use and Reporting: Monthly meter readings must be submitted to the District Billing Department at billing@sunnyslopedwater.org on or before the due date indicated on the permit. A 10% non-reporting penalty will apply for failure to report timely usage. All usage must comply with District policies and state water-conservation regulations. Unauthorized hydrant use or tampering is prohibited under District Code § 3.05.080 and is subject to penalties and discontinuance of service.

5. Term of Rental The rental period shall not exceed one (1) year from the date of issuance. The meter must be returned by or before the contract expiration date listed on the application for an annual inspection.

6. Liability The District shall not be liable for interruptions in service, pressure fluctuations, or damage resulting from hydrant operation. The permittee agrees to hold the District harmless from any claims arising from the use of the hydrant meter or connection.

7. Return of Equipment Meters must be returned to the District office during regular business hours. Upon inspection and verification of no damage, deposits will be refunded by check within 30 days.

By signing below, the contractor/permittee acknowledges receipt of this fact sheet, understanding of the District’s requirements, and acceptance of responsibility for the hydrant meter and related charges.
